

Clark Forklift Parts

Performing worldwide, there are now 350,000 Clark forklifts and lift vehicles in operation, with upwards of 250,000 of those operating in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are a few of their specialties. Clark Totalift has 20 unique brands of forklifts, with parts covering more than 120,000 specific items for all of its automated equipment. Your regional Clark Dealer is your complete source for availability of all your components requirements supplied by Clark Totalift. Clark features a exceptional Parts Supply team. The items warehouses are conveniently stationed in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their dealers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to supply the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing productivity and benefiting performance. Worldwide, Clark has one of the most outstanding dealer support networks. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their customers predominates the materials handling market. By pioneering the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is at this time a customary feature on every forklift. Clark's continual mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first lift truck maker across the world to be certified with the internationally approved quality standard ISO 9001 for every one of their manufacturing plants. Additionally, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any environmental limitations, thus placing them in a dominant market position. Clark has selected the structure of "Lean Manufacturing" at all of its assembly plants because this method is extremely economical and enables minimal use of resources. Established to ensure maximum efficiency, this system is intended to find and acknowledge the most efficient methods for manufacturing facility management. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies. By working together, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing expenses. The new value engineering agenda combines modern product development and provides improved client support and service within the industry.
